***Allowable Subject Matter***

Claims 1-10 allowed as a result of an Affidavit filed on October 2, 2006 from Applicant to show unexpected lab data result.

The closest relevant art is Call et al (6,120,573) wherein Call et al disclose a microimpactor system comprising a fluid conduit having a plurality of rows of microimpactors (12) arranged in the fluid conduit substantially transverse to a main direction of flow of fluid (16) through the fluid conduit, wherein the microimpactors (12) in at least two successive row are offset from each other (13a, 13b, 13c, col. 5, lines 4-10). Call et al further disclose the fluid conduit including a fluid inlet (42) and a fluid outlet (46 in Fig. 3B), means for moving fluid (58) through the system (col. 9, lines 25-34), and means for applying an electrical charge to the at least one microimpactor (col. 13, line 47 through col. 14, line 10).

Claims 1-10 of this instant patent application differ from the disclosure of Call et al in that the claims call for specific spacing between adjacent microimpactors, wherein the spacing between adjacent microimpactors within a row from about 3 to about 20 times the microimpactor width, and the spacing between adjacent rows of microimpactors from about 3 to about 20 times the microimpactor width.
